Design Research – Existing Floor Plan

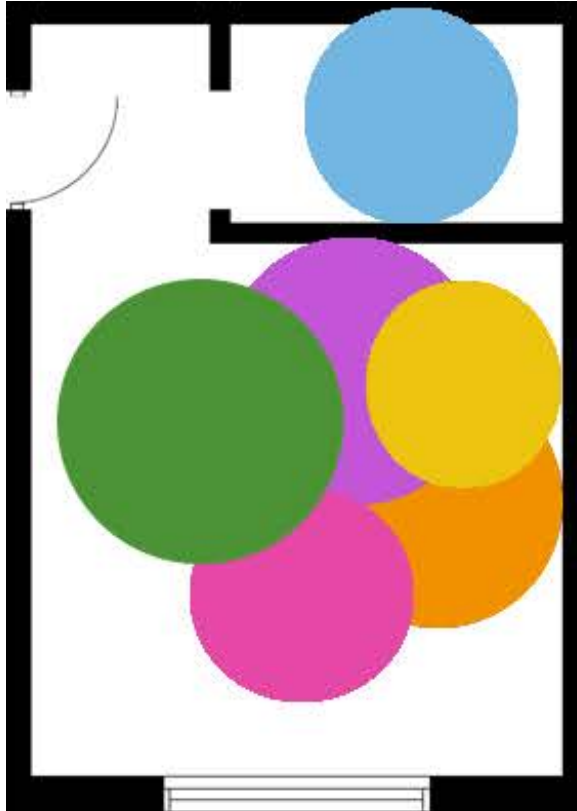

Design Research – Story board and mind map of spacial requirements

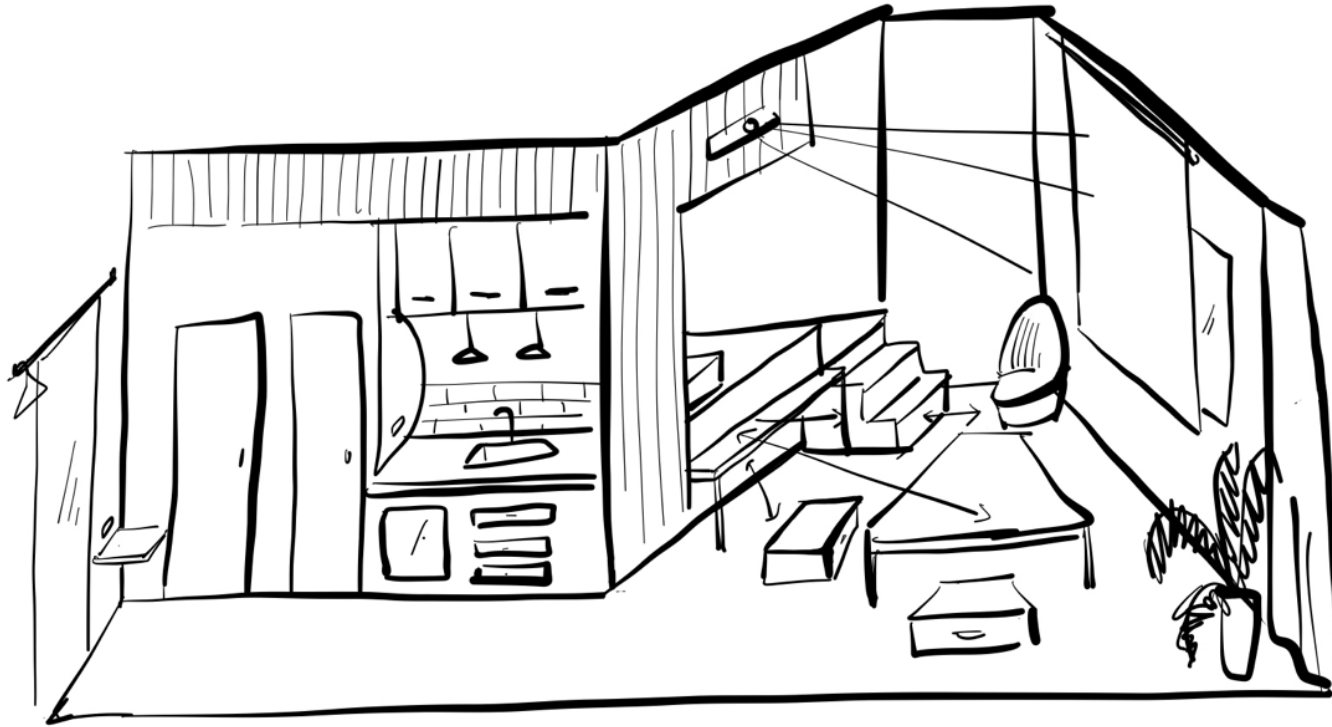

A tourist visiting the city and catching up with friends

Concept Idea – Spatial Diagram

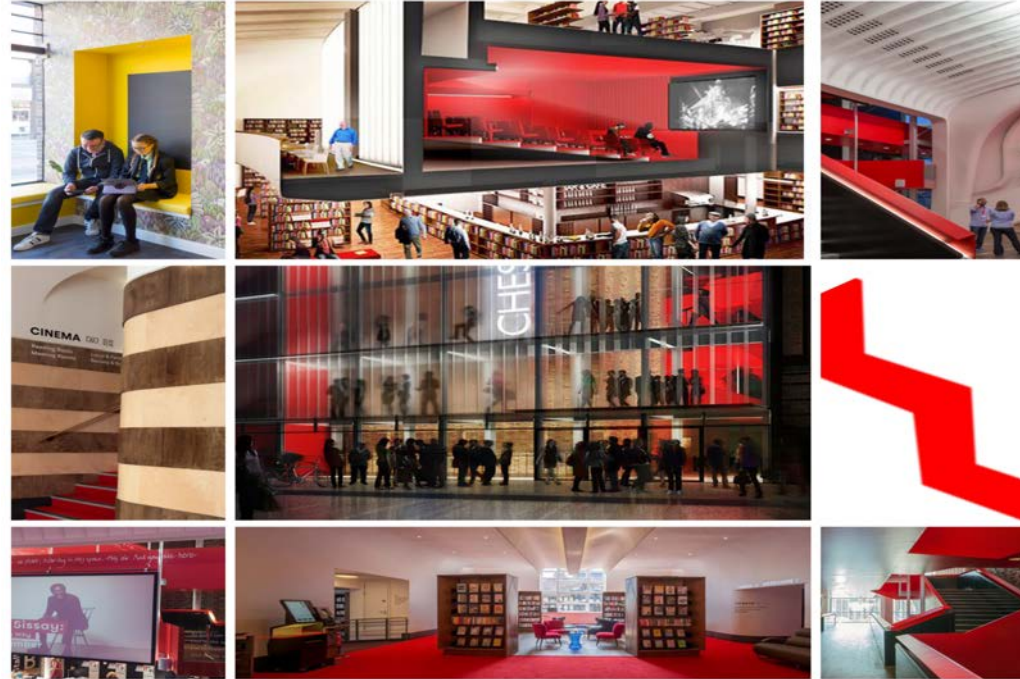

Concept Idea – Spatial Precedent

I want to create a cube which includes everything you need in an apartment, a way to adapt the space for social/work needs.

Concept Idea - Inspiration Board

The story house has a cinema 'cube' within a larger space to create a cosy more intimate feel during films (times of relaxing). A lot of smaller spaces in one big area for different uses. These areas are cleverly lit and coloured to create a certain atmosphere.

Concept Idea - Inspiration Board

Some 'cubed' rooms in other designs and platforms used to give areas more of a theatrical feel and a way to store items/furniture. Cinemas are designed on a step structure.

Concept Idea - Exploration Image

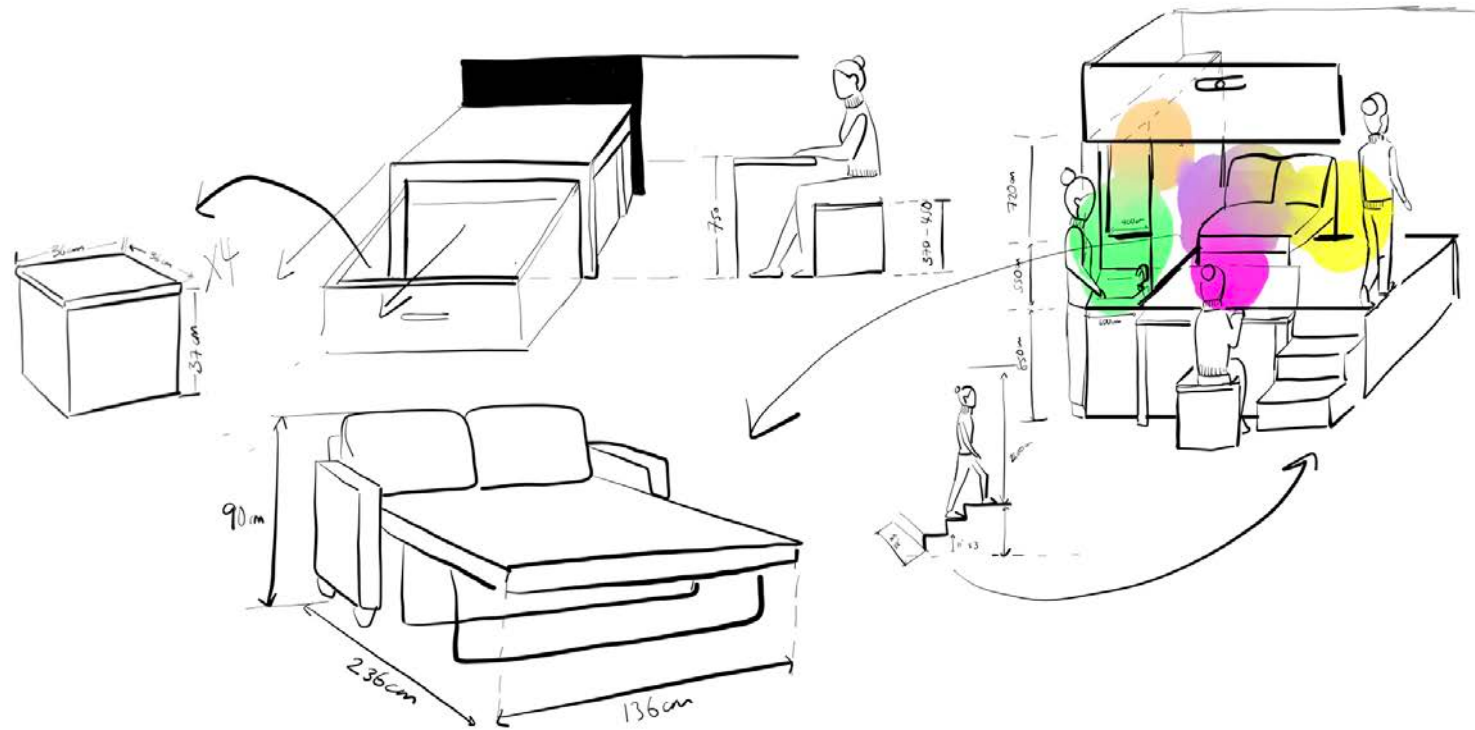

This exploration image shows the structure I want to create.

A contained space for the bedroom and kitchen area.

Different areas can be lit for a different feel or mood.

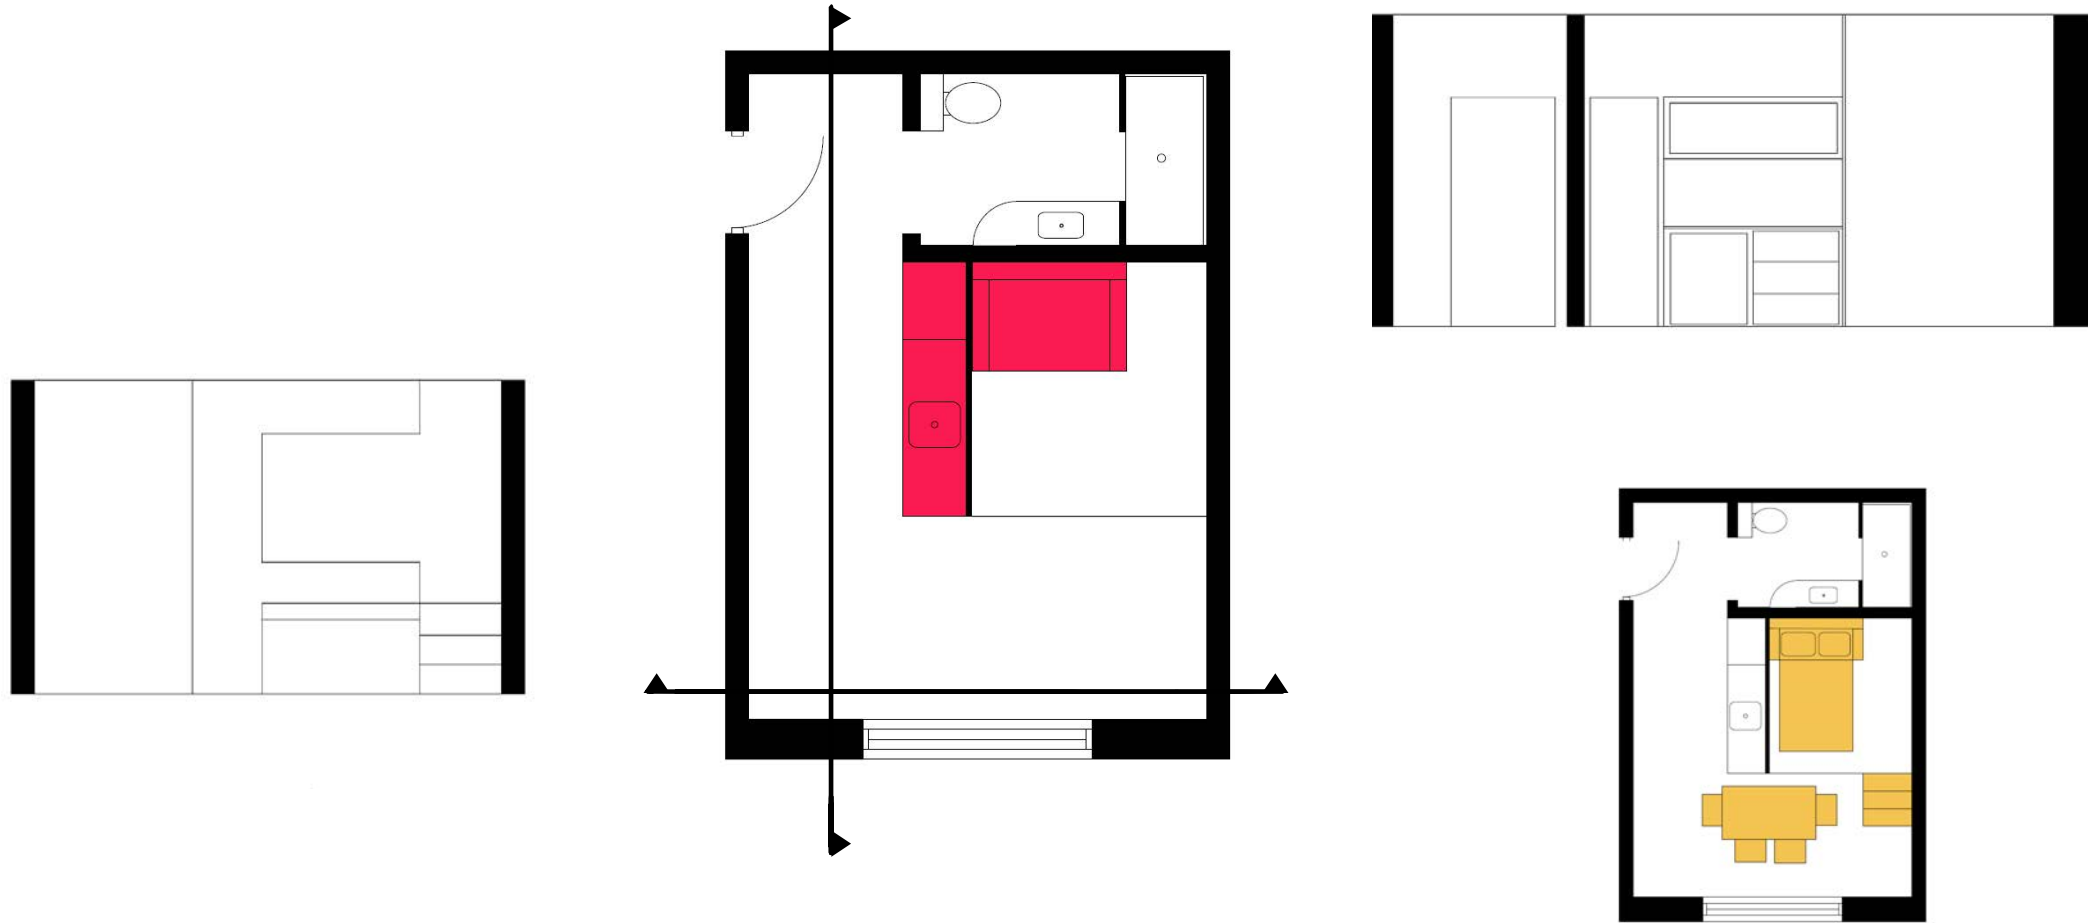

Ergonomic Research – Drawings

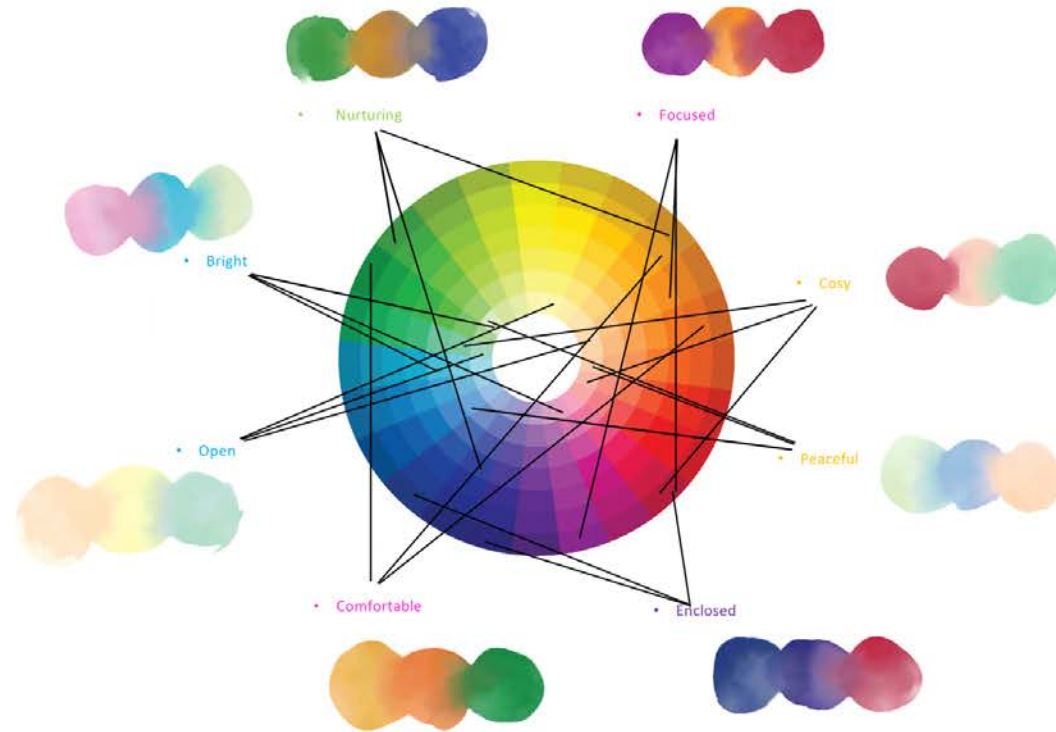

Nesting parts of furniture layered and stacked together.

Ergonomic Research – Preferred layout, Scaled Plan and Section Plan

Ergonomic Research – Preferred Colour Palette

Material and Colour Exploration – Material Colour Precedent

Looking at traditional and modern cinemas.

Material and Colour Exploration – Material Colour Precedent

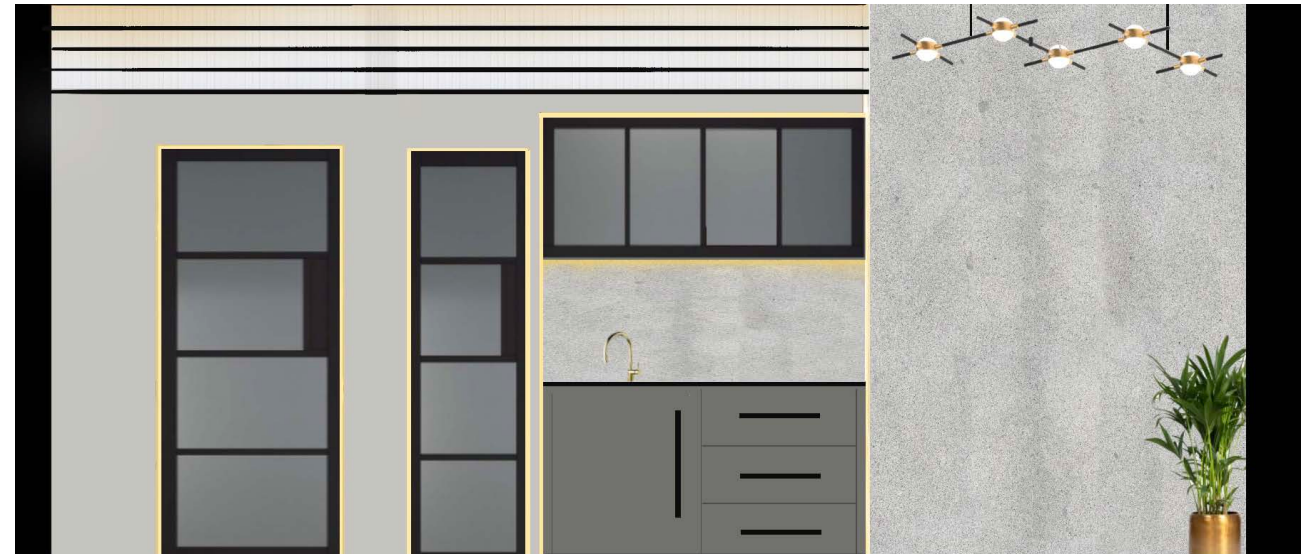

A look at colours and textures from a site visit at The Story House.

Material and Colour Exploration – Material Colour Precedent

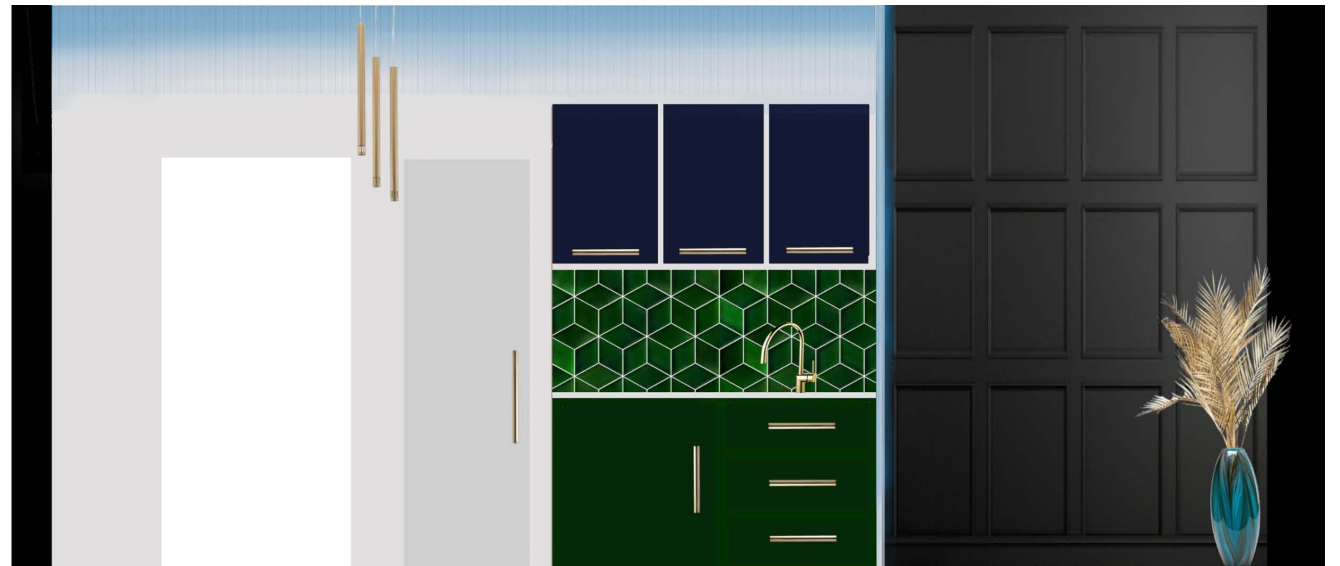

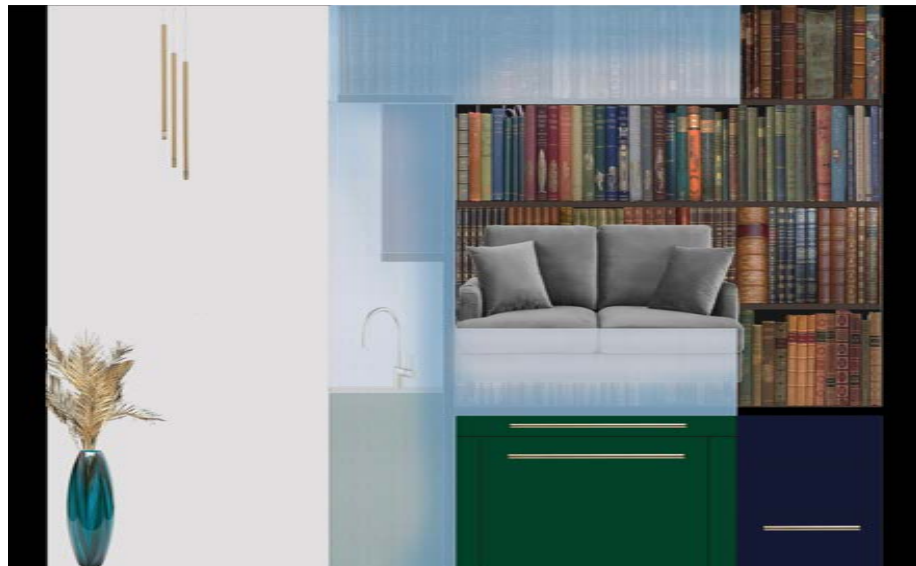

Ideas of how areas interlock into a larger space and are lit up to highlight certain zones.
